

Andrea Bugeja

Data DevOps Engineer

andreabugeja.me | contact@andreabugeja.me | LinkedIn | github.com/arogan178
Data DevOps Engineer focused on Kubernetes data platforms, GitOps delivery, and production streaming infrastructure across AWS and Linux environments.

TECHNICAL SKILLS

Platform & Cloud: Kubernetes, OpenShift, Helm, Docker, AWS, Linux

Data Infrastructure: Kafka, ClickHouse, Redis Cluster, NiFi

Automation & Delivery: Ansible, AWX, ArgoCD, Jenkins, Python, PowerShell

Observability: Grafana, Prometheus

EXPERIENCE

Gaming Innovation Group

Jul 2023 – Present

Data DevOps Engineer

- Operate production Kubernetes data platforms supporting Kafka, ClickHouse, Redis, and other core streaming services.
- Maintain GitOps and configuration workflows with ArgoCD, Ansible, Helm, and Python to keep deployments repeatable and auditable.
- Support AWS capacity planning, cost optimisation, and platform reliability across operational environments.

APS Bank plc

Jul 2022 – Jul 2023

Senior DevOps Analyst

- Built automated test suites for online banking platforms to improve release confidence and reduce manual QA effort.
- Introduced CI/CD pipelines for teams moving from manual deployments to controlled, repeatable delivery.
- Supported core banking applications across environments, including internet banking, CRM, and property management systems.

APS Bank plc

Mar 2019 – Jul 2022

DevOps Analyst

- Served as primary operational owner for internet banking deployments, support, release coordination, and documentation.
- Automated reporting workflows and built PowerShell dashboards to improve visibility into real time system health.

EDUCATION

MSc in Artificial Intelligence

University of Malta

Thesis: Personalised Pain Conditioning through Affective Computing and Virtual Reality; IEEE BIBM 2023 conference paper.

BSc (Hons) Computing with Game Design & Development

St. Martin's Institute of Higher Education

Thesis: Changing Perceived Game Difficulty in First Person Shooters through Resource Adjustments in CS:GO.

CERTIFICATIONS

CKAD – Certified Kubernetes Application Developer, The Linux Foundation

LF-0zczl725oh

PROJECTS

MacroTrackr

macrotrackr.com | GitHub

Open source nutrition tracking app with hosted cloud and self hosted options, built with React, TypeScript, Bun, Elysia, SQLite, and Docker Compose.
