

Andrea Bugeja

Data DevOps Engineer

andreabugeja.me | contact@andreabugeja.me | LinkedIn | github.com/arogan178
Data DevOps Engineer focused on Kubernetes and OpenShift data platforms, GitOps automation,
FinOps right-sizing, stateful workload migration, and secure streaming infrastructure across
AWS and Linux environments.

TECHNICAL SKILLS

Platform & GitOps: Kubernetes, OpenShift, Helm, Kustomize, ArgoCD, Docker

Data Infrastructure: Kafka, Strimzi, ClickHouse, PostgreSQL, Redis, NiFi, MinIO, Azure Cosmos DB

Automation & Backend: Python, Bash, Ansible, Terraform, Jenkins, FastAPI, Pydantic, SQLAlchemy

Security & Observability: HashiCorp Vault, Keycloak/OIDC, SOPS, RBAC, Grafana, Prometheus, Goldilocks/VPA

EXPERIENCE

Gaming Innovation Group

Jul 2023 – Present

Data DevOps Engineer

- Built Python/Bash GitOps automation for cluster bootstrap, ArgoCD/Kustomize manifests, and cross-datacenter replication, cutting environment scaffolding from weeks to about 60 seconds.
- Developed a VPA/Goldilocks FinOps updater that parses Kubernetes recommendations and opens Bitbucket PRs, right-sizing workloads across 11 distinct internal namespaces.
- Automated ClickHouse upgrade blockers, Kafka Connect Azure CosmosDB integration, Strimzi ACL deduplication, GitOps egress firewall PRs, Vault snapshots, and safer Ansible deployment limits.

APS Bank plc

Jul 2022 – Jul 2023

Senior DevOps Analyst

- Built automated test suites for online banking platforms and introduced CI/CD pipelines for controlled, repeatable delivery.
- Supported core banking applications across environments, including internet banking, CRM, and portfolio management systems.

APS Bank plc

Mar 2019 – Jul 2022

DevOps Analyst

- Owned internet banking deployments, support, release coordination, and documentation; automated PowerShell reporting dashboards for real-time health visibility.

EDUCATION & CERTIFICATIONS

MSc in Artificial Intelligence, University of Malta IEEE BIBM 2023 paper; VR/affective computing thesis.

BSc (Hons) in Computing with Game Design & Development, St. Martin's Institute of Higher Education

CKAD – Certified Kubernetes Application Developer, The Linux Foundation

LF-0zczl725oh

OPEN SOURCE & PROJECTS

RAGFlow Open Source

Merged PR #10524 | Merged PR #11416

Contributed PostgreSQL retry resiliency and single-bucket MinIO/S3 storage mode for enterprise reliability, reduced bucket sprawl, and stricter IAM policies.

MacroTrackr

macrotrackr.com | GitHub

AGPLv3 self-hostable nutrition tracker with local auth, SQLite persistence, Docker Compose/GHCR deployment, React, TypeScript, Bun, and Elysia.
